

761 – COVID-19 WORKPLACE RESPONSE PLAN

NEWKIRK ELECTRIC ASSOCIATES, INC.

COVID-19 Workplace Response Plan

Index	Section
Purpose	761.1
Scope	761.2
Responsibilities	761.3
Jobsite Protective Measures	761.4
Jobsite Cleaning and Disinfecting	761.5
Jobsite Exposure Situations	761.6
Recordkeeping	761.7
Confidentiality/Privacy	761.8

761 – COVID-19 WORKPLACE RESPONSE PLAN

761.1 PURPOSE

- A. The purpose of this Plan is to reduce the risk of exposure to COVID-19 in the Company’s work locations. The Plan describes how to prevent worker exposure to coronavirus, protective measures to be taken on the jobsite, personal protective equipment and work practice controls to be used, cleaning and disinfecting procedures, and what to do if a worker becomes ill.

761.2 SCOPE

- A. Newkirk Electric Associates takes the health and safety of our employees very seriously. With the spread of the coronavirus or “COVID-19,” a respiratory disease caused by the SARS-CoV-2 virus, we all must remain vigilant in mitigating the outbreak. In order to be safe and maintain operations, we have developed this COVID-19 Workplace Response Plan to be implemented throughout the Company and on all our jobsites. We have also identified a team of employees to monitor available U.S. Center for Disease Control and Prevention (“CDC”) and Occupational Safety and Health Administration (“OSHA”) guidance on the virus.
- B. This Plan is based on currently available information from the CDC and OSHA and is subject to change based on further information provided by the CDC, OSHA, and other public officials.
- C. Specific questions about this Plan or COVID-19 should be directed to the immediate manager or supervisor. If they cannot answer the question, the employee should contact the Human Resources Manager.

761.3 RESPONSIBILITIES

A. Managers and Supervisors

- (1) All managers and supervisors must be familiar with this Plan and be ready to answer questions from employees.
- (2) Managers and supervisors must always set a good example by following this Plan. This involves practicing good personal hygiene and jobsite safety practices to prevent the spread of the virus. Managers and supervisors must encourage this same behavior from all employees.
- (3) Managers and Supervisors are expected to report any COVID-19 cases or potential cases to the Human Resources Manager immediately.

B. Employees

- (1) Employees are expected to report to their managers or supervisors if they are experiencing signs or symptoms of COVID-19, as described below.
 - (a) Coughing
 - (b) Fever greater than 100.4
 - (c) Shortness of breath, difficulty breathing
 - (d) Early symptoms such as chills, body aches, sore throat, headache, nausea/vomiting, and runny nose
- (2) If an employee develops a fever and symptoms of respiratory illness, such as cough or shortness of breath, they should NOT REPORT TO WORK and contact his/her healthcare provider.
 - (a) If an employee should come into close contact with someone exhibiting these symptoms, they should contact his/her healthcare provider.

761 – COVID-19 WORKPLACE RESPONSE PLAN

- (3) Employees will practice the following control and preventative measures regardless of exposure risk:
 - (a) Frequently wash hands with soap and water for at least 20 seconds. When soap and running water are unavailable, use an alcohol-based hand rub with at least 60% alcohol.
 - (b) Avoid touching eyes, nose, or mouth with unwashed hands.
 - (c) Follow appropriate respiratory etiquette, which includes covering for coughs and sneezes.
 - (d) Avoid close contact with people who are sick.

761.4 JOBSITE PROTECTIVE MEASURES

A. General Safety Policies and Rules

- (1) Designate an individual as the COVID-19 supervisor(s) who shall always be present on the jobsite and must enforce the precautionary measures contained in this Plan.
- (2) Employees who have CDC-recognized symptoms of COVID-19 shall notify their supervisor and stay home. Any employee showing symptoms of COVID-19 on site will be immediately isolated and required to leave the jobsite to be quarantined and to seek proper medical treatment.
- (3) Safety Stand-Downs/Toolbox Talks will be required on all job sites and must detail the protective measures in place for all workers. A minimum of six (6) feet of separation must be maintained between all employees at these meetings. Employees must be provided copies of the SF-202 Work Plan, SF-203 Fit for Duty Questionnaire, and the SF-204 Case Risk Assessment (for Managers), and COVID-19 Prevention and Work Practice Controls upon return to work.
- (4) The Company will create a dedicated entry point at every worksite, if possible, for daily screening as called for in this plan.
 - (a) Employees who start their workday from home or a remote location, and do not have availability to a formal screening by others, must self-evaluate and record their individual status of form SF-203 Fit for Duty Questionnaire. Complete form must be made available if a customer or facility requests verification of the employee's pre-work screening.
- (5) The Company will maintain a daily attendance log of all employees on jobsites in a manner which enables rapid contact tracing between employees in the event an employee on a jobsite tests positive for COVID-19.
 - (a) Attendance will be collected verbally, and the foreman/superintendent will sign in each employee.
 - (b) During attendance, employees will be screened for COVID-19 symptoms by self-identifying symptoms such as cough, fever, shortness of breath, or other symptoms listed elsewhere in this document.
 - (c) Employees may be required to submit to additional or enhanced screenings as customer facilities mandate. Customer specific screening such as non-contact body temperature measurements, will be administered by Newkirk management or customer designated personnel who have been trained.
- (6) Employees must avoid physical contact with others and direct employees/contractors/visitors to increase personal space to at least six (6) feet, where possible.
 - (a) Where work trailers are used, only necessary employees should enter the trailers and all employees should maintain social distancing while inside the trailers.

761 – COVID-19 WORKPLACE RESPONSE PLAN

- (7) Employees will be prohibited from congregating during scheduled break times. A minimum of six (6) feet of separation must be maintained amongst all employees during breaks.
 - (8) The Company will identify choke points and high-risk areas where workers must stand near one another (such as hallways, hoists and elevators, break areas, water stations, and buses) and control their access and use so that social distancing is maintained.
 - (9) The Company will provide soap and running water on all jobsites for frequent handwashing. In the event running water is not obtainable on a jobsite, the Company will provide alcohol-based hand sanitizers with a minimum of 60% ethanol or 70% isopropanol.
 - (10) Employees should limit the use of coworkers' tools and equipment. To the extent tools must be shared, the Company will provide cleaning/sanitation products to clean tools before and after use.
 - (a) When cleaning tools and equipment, consult manufacturing recommendations for proper cleaning techniques and restrictions.
 - (b) If practicable, an employee should use/drive the same truck or piece of equipment every shift.
 - (11) Vehicle Usage
 - (a) Vehicle occupancy should be reduced as low as practicable to increase physical distancing inside the vehicle.
 - (b) If more than one employee is to share or ride in a vehicle with another Newkirk employee, customer, or facility personnel, face-coverings and other appropriate PPE must be worn by all occupants of the vehicle.
 - (c) Eating, smoking, and drinking within a shared vehicle is prohibited.
 - (d) Employees will be notified of shared vehicle requirements if required to share a vehicle.
 - (e) Customer, facility or project requirements dictating specific vehicle occupancy will be addressed with the individual customer.
 - (12) In lieu of using a common source of drinking water, such as a cooler, employees must use individual water bottles.
- B. Workers entering Occupied Buildings**
- (1) When employees perform construction and maintenance activities within occupied office buildings, and other establishments, these work locations present unique hazards with regards to COVID-19 exposures. All such workers should evaluate the specific hazards when determining best practices related to COVID-19.
 - (2) During this work, employees must sanitize the work areas upon arrival, throughout the workday, and immediately before departure. The Company will provide cleaning/sanitation products for this process.
 - (3) Employees should ask other occupants to keep a personal distance of six (6) feet at a minimum. Workers should wash or sanitize hands immediately before starting and after completing the work.
 - (4) Masks should be worn when workers cannot consistently maintain six (6) feet of separation from other individuals in the workplace.
- C. Jobsite Visitors**

761 – COVID-19 WORKPLACE RESPONSE PLAN

- (1) The number of visitors to the job site, including the trailer or office, will be limited to only those necessary for the work.
- (2) All visitors will be screened in advance of arriving on the job site. If the visitor answers “yes” to any items on SF-203 (below) or any of the following questions, he/she should not be permitted to access the jobsite:
 - (a) Have you or someone in your household traveled internationally or domestically within the last 14 days?
 - (b) Have you been diagnosed with COVID-19 in the last 14 days?
 - (c) Have you had close, prolonged contact with or cared for someone diagnosed with COVID-19 within the last 14 days?
 - (d) Are you or someone in your household currently experiencing, or recently experienced (previous 14 days), any acute respiratory illness symptoms such as fever, cough, or shortness of breath?
- (3) Site deliveries will be permitted but should be properly coordinated in line with the employer’s minimal contact and cleaning protocols. Delivery personnel should remain in their vehicles if possible and a minimum of six (6) feet of separation must be maintained between employees and delivery personnel.

D. Personal Protective Equipment and Work Practice Controls

- (1) In addition to regular PPE for workers engaged in various tasks (fall protection, hard hats, hearing protection), the Company will also provide masks, gloves, and eye protection.
- (2) Masks: The Company will provide, non-medical grade face coverings. These items must be worn when workers cannot consistently maintain a minimum of six (6) feet of separation.
 - (a) Masks will be issued to employees in appropriate quantities prior to employees accessing work sites.
 - (b) The CDC currently does not recommend that healthy people wear N95 respirators to prevent the spread of COVID-19.
- (3) Gloves: Glove use will be task dependent. The type of glove worn should be appropriate to the task.
 - (a) Based on WHO and CDC findings, Newkirk Electric does not require or recommend employees wear nitrile gloves or approved equivalent.
- (4) Eye protection: Regardless of COVID, eye protection must always be worn while on site.
- (5) Work Practice Controls due to the shortage of N95 respirators should be followed.
 - (a) Keep dust down by using engineering and work practice controls, specifically through the use of water delivery and dust collection systems.
 - (b) Limit exposure time to the extent practicable.
 - (c) Isolate workers in dusty operations by using a containment structure or distance to limit dust exposure to those employees who are conducting the tasks, thereby protecting nonessential workers and bystanders.
 - (d) Institute a rigorous housekeeping program to reduce dust levels on the jobsite.

761.5 JOBSITE CLEANING AND DISINFECTING

761 – COVID-19 WORKPLACE RESPONSE PLAN

- A. The Company will require regular housekeeping practices, including cleaning and disinfecting frequently used tools and equipment, and other elements of the work environment, where possible. Employees should regularly do the same in their assigned work areas.
- B. Jobsite trailers and break/lunchroom areas should be cleaned at least once per day. Employees performing cleaning will be issued proper personal protective equipment (“PPE”) as recommended by the CDC.
- C. Any trash collected from the jobsite should be changed frequently. Dispose of soiled PPE in labeled containers.
- D. Any portable jobsite toilets provided by the Company should be cleaned regularly during the workweek and disinfected on the inside. Hand sanitizer dispensers should be maintained and filled regularly. Frequently touched items (i.e. door pulls and toilet seats) will be disinfected frequently.
- E. Vehicles and equipment/tools should be cleaned at least once per day and before change in operator or rider.
- F. If an employee has tested positive for COVID-19, the Company will clean and disinfect those areas of the jobsite that a confirmed-positive individual may have come into contact with before employees can access that workspace again. The Company will also notify contractors or owners of any confirmed COVID-19 cases among its workers.
- G. The Company will ensure that any disinfection shall be conducted using one of the following:
 - (1) Common EPA List N household disinfectant;
 - (2) Alcohol solution with at least 60% alcohol; or
 - (3) Diluted household bleach solutions (these can be used if appropriate for the surface).

761.6 JOBSITE EXPOSURE SITUATIONS

- A. Employee Exhibiting COVID-19 Symptoms
 - (1) Employees who exhibit COVID-19 symptoms and were directed to care for themselves at home may discontinue isolation under the following conditions:
 - (a) Resolution of a fever without the use of fever-reducing medications; **and**
 - (b) Improvement in respiratory symptoms (e.g. cough, shortness of breath); **and**
 - (c) Negative results of an FDA Emergency Use Authorized COVID-19 molecular assay for detection of SARS-CoV-2 RNA from at least two consecutive respiratory specimens collected ≥ 24 hours apart (total of two negative specimens).
 - (2) To the extent practical, employees are required to obtain a doctor’s note clearing them to return to work.
- B. Employee Tests Positive for COVID-19
 - (1) An employee that tests positive for COVID-19 will be directed to self-quarantine away from work.
 - (a) Employees that test positive and are symptom free may return to work when at least 10 (10) days have passed since the date of his or her first positive test, and they have not had a subsequent illness.
 - (2) Employees that test positive and are directed to care for themselves at home may return to work when:
 - (a) At least 72 hours (3 full days) have passed since recovery; and

761 – COVID-19 WORKPLACE RESPONSE PLAN

- (b) At least ten (10) days have passed since symptoms first appeared.
- (3) Employees that test positive and have been hospitalized may return to work when directed to do so by their medical care provider.
- (4) The Company may require an employee to provide documentation clearing their return to work.
- (5) Employee Has Close Contact with a Tested Positive COVID-19 Individual
 - (a) Employees that have come into close contact with a confirmed-positive COVID-19 individual (co-worker or otherwise), will be directed to self-quarantine for 14 days from the last date of close contact with the carrier.
 - (i) Close contact is defined as within six (6) feet for a prolonged time period.
 - (b) If the Company learns that an employee has tested positive, the Company will conduct an investigation into co-workers, or customers at facilities that may have had close contact with the confirmed-positive employee in the prior 14 days and direct those individuals that have had close contact with the confirmed-positive employee to self-quarantine for 14 days from the last date of close contact with the carrier.
 - (c) Customer/Facility owners will be notified of any Newkirk employee that has worked in their facility within the previous 14 days of the employee being confirmed positive for Covid-19.
 - (d) If an employee learns that he or she has come into close contact with a confirmed-positive individual outside of the workplace, he/she must alert a manager or supervisor of the close contact and self-quarantine for 14 days from the last date of close contact with the carrier.

761.7 RECORDKEEPING

- A. If a confirmed case of COVID-19 is reported, the Company will determine if it meets the criteria for recordability and reportability under OSHA's recordkeeping rule. If the confirmed case meets recordability and reportability criteria, it will be properly documented on the OSHA 300 Log and as well as documented on an OSHA Form 301.
 - (1) If an employee has a confirmed case of COVID-19 that is considered work-related, the Company will report the case to OSHA if it results in:
 - (a) A fatality within 30 days or
 - (b) An in-patient hospitalization within 24-hours of the exposure incident occurring.
 - (i) In-Patient hospitalization is defined as a formal admission to the in-patient service of a hospital for care or treatment.
- B. If an employee has a confirmed case of COVID-19, the Company will assess any workplace exposures to determine if the case is work-related.
 - (1) Work-relatedness is presumed for illnesses that result from events or exposures in the work environment, unless it meets certain exceptions. One of those exceptions is that the illness involves signs or symptoms that surface at work but result solely from a non-work-related event or exposure that occurs outside of the work environment. Thus, if an employee develops COVID-19 solely from an exposure outside of the work environment, it would not be work-related, and thus not recordable.

761 – COVID-19 WORKPLACE RESPONSE PLAN

- C. The Company's assessment will consider the work environment itself, the type of work performed, risk of person-to-person transmission given the work environment, and other factors such as community spread.

761.8 CONFIDENTIALITY/PRIVACY

- A. Except for circumstances in which the Company is legally required to report workplace occurrences of communicable disease, the confidentiality of all medical conditions will be maintained in accordance with applicable law and to the extent practical under the circumstances.
- B. When it is required, the number of persons who will be informed of an employee's condition will be kept at the minimum needed not only to comply with legally-required reporting, but also to assure proper care of the employee and to detect situations where the potential for transmission may increase.
- C. The Company reserves the right to inform other employees that a co-worker has been diagnosed with COVID-19 if the other employees might have been exposed to the disease so the employees may take measures to protect their own health.
